AWS Cloud Security & Compliance Program

AWS Cloud Security & Compliance Program

BUILD IN SECURITY FROM THE BEGINNING. This engagement prepares your Amazon Web Services environment for a cloud security program, meeting a variety of compliance and regulatory standards. ScaleSec will guide your organization through the development and launch of an effective security management program.

Secure Cloud Program

This 10 week engagement creates or transforms security programs to be able to bootstrap, operate, measure, and strategize security needs within AWS environments.

ScaleSec will customize your security program to align to cloud provider guidance and industry frameworks including:

- ✓ AWS Cloud Adoption Framework
- ✓ AWS Well Architected Framework
- ✓ AWS Security Reference Architecture
- ✓ Popular compliance frameworks

Outcomes from the program include:

- Documented existing practices
- Documented processes, standards, controls aligned to desired framework
- AWS security guidance for developers
- A roadmap to achieve the next level of security maturity
- Prescriptive guidance and metrics

Intended Audience

Security leaders are encouraged to participate in discussing important decisions. Security operations team members are also encouraged to join.

AWS Platform Experts

ScaleSec consultants are APN Ambassadors, AWS certified experts who will collaborate with your team to leverage and implement AWS services and features to support your organization's specific regulatory and compliance needs. Our experts will work with you to transform your program with experience in:

- 🔒 Network and Infrastructure Security
- 🔒 DevSecOps
- 🔒 Data protection and Encryption
- 🔒 Operational Security Monitoring and Response
- 🔒 Secure SDLC Best Practices

Compliance frameworks supported
