Google Cloud Security & Compliance Program

ScaleSec

Google Cloud Security & Compliance Program

DEVELOP A STRONG SECURITY PROGRAM. This engagement prepares your Google Cloud security program for security, scalability, and manageability. ScaleSec will walk through each major outcome to ensure a robust security program for your business.

Cloud Security Program Development

Whether you are launching a new security program or modernizing an existing security program– ScaleSec can help in managing ongoing security and compliance in the cloud for popular frameworks.

This 10-week engagement includes several phases to develop your cloud security program:

- ✓ Development of a risk matrix
- ✓ Creation of policy templates
- ✓ Document control responses
- ✓ Create and organize supporting audit artifacts

Outcomes from the program include:

- Documented existing practices
- Documented processes, standards, controls aligned to desired framework
- GCP security guidance for developers
- A roadmap to achieve the next level of security maturity
- Prescriptive guidance and metrics

Intended Audience

Security managers are encouraged to participate in discussing important decisions. Compliance specialists and product developers are also encouraged to join.

AWS Platform Experts

Engagement Scope

- 🔒 This engagement covers a broad range of outcomes including:
- 🔒 Populating a risk matrix to prioritize security efforts
- 🔒 Recommendations for framework category inclusion and exclusion
- 🔒 Strategy to launch and maintain your security or compliance program
- 🔒 Creation of system and software lifecycle methods
- 🔒 Compliance cloud security recommendations
- 🔒 Expert advice on how to prepare your artifacts to pass an audit

Compliance frameworks supported
