

CloudSec Kickstart - SOC 2

CloudSec Kickstart - SOC 2

BUILD A STRONG COMPLIANCE STORY FOR THE ENTERPRISE MARKET. This short assessment positions your cloud organization to quickly build trust with your most scrutinizing customers.

Approach

Unlike typical box-checking compliance assessments, ScaleSec cloud experts will review your platform security architecture and provide detailed recommendations to meet SOC 2 compliance using the cloud-native features your developers love. You'll get a tailored plan and roadmap so you can schedule your audit with confidence.

Engagement activities include:

- Kickoff briefing
- Interactive SOC 2 Bootcamp for program leaders
- Discovery sessions to capture security capabilities and practices
- Review of cloud architecture for security best practices
- Report outbrief and next steps review

Your team will learn how to:

- 🔒 Select and work with a SOC 2 auditor
- 🔒 Launch your SOC 2 compliance program
- 🔒 Prepare for your SOC 2 audit
- 🔒 Optimize your cloud platform security
- 🔒 Minimize costs with modern cloud engineering methods

Audience

Leaders from sales, business, security, and engineering are encouraged to participate. No prior experience with compliance is required.

Outcomes

Following the engagement activities, ScaleSec will prepare a written report and comprehensive plan to pass the SOC 2 audit, including:

- ✓ Recommendations for SOC 2 category inclusion and exclusion
- ✓ Strategy to launch and maintain your compliance program
- ✓ Gaps needing remediation prior to a SOC 2 audit
- ✓ System and software lifecycle management methods
- ✓ Compliance cloud security architecture recommendations
- ✓ Expert advice on how to prepare your existing systems to pass the audit
