

Verticals and Success

Verticals and Success

Start Up

We enable fast-moving, cutting-edge companies to develop scalable, cloud-native platforms and practices.

Healthcare

When it comes to our health, speed *and* security matter. Jumpstart your healthcare workloads with automated best practices.

Retail

From compliance solutions to cloud-scale data analytics, our team guides yours on how to use automation to streamline your customers' experience.

Enterprise

We deliver solutions that fit even the most complicated business structures, with realistic road maps and achievable goals.

SUCCESS Stealth Healthcare Startup Selects ScaleSec as its Trusted GCP Security Consulting Partner

With a schedule of just weeks, ScaleSec partnered with a fast-moving startup to successfully launch a proof of concept, securely connecting their service to a national healthcare provider's network.

HIPAA compliance, IAM, logging, encryption practices, application performance, and policy development, among a myriad of other concerns, all played into the successful 6-week jumpstart to a stronger security posture and more confident team.

SUCCESS Established Retail Giant Uses **Cloud Discover: Security Workshop** to Scale Security Architecture

Scability and change can be hard when an entire platform is affected. ScaleSec led an in-depth Cloud Discover: Security workshop to help a well-known retail presence examine their processes, identifying ways to create a more robust cloud architecture while improving the work already completed.

The team left with a clear roadmap for the future, and a stronger understanding of the possibilities within the cloud.
